

Product datasheet for **MWM1001**

MYC/DDK Tagged Western Blot Molecular Weight Markers

Product data:

Product Type:	Molecular Tools
Description:	Pre-mixed molecular weight markers with 5 over-expressed cell lysates with Myc/DDK tags covering 23 to 158 KDa. Each Vial contains 50 ug total protein per tube; Provided at a concentration of 1 mg/ml. Sufficient for 20 loads.
Note:	Combine 2.5 µl of product with 1 µl of BME and boil before using it to ensure proper separation of bands
Detection Antibodies:	A7, Anti-Myc tag monoclonal antibody (TA100010); DDK Rabbit monoclonal antibody, recognizing both N- and C-terminal tags (TA592569)

Product images:

Western Blot Image: 2.5ul pre-mixed molecular weight marker (MWM1001) was loaded onto the precast gel. Western blot analysis was performed with anti-DDK antibody (Cat# [TA50011-100]) at 1:2,000 dilution.
